SMART SOLUTIONS FOR THE LABELING INDUSTRY

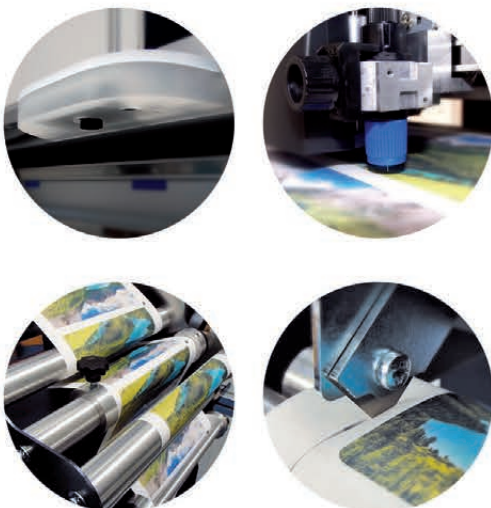

SCORPIO - DIGITAL LABEL CUTTER

mscorpio

Panel CE6000-40

Contour cutting, waste removal and slitter in a whole compact and use friendly equipment, Scorpio is the right cutting system to be offered as complementary accessory for all the digital color label printers.

With Scorpio you will never have to purchase a die toll since your labels will be cut digitally in any shape and quantity requested. This device allows the production of short run labels with reliability and low cost.

The management software, using its own camera, offers an optical recognition feature for the digital die cutting with self-learning functions on black mark reading in order to optimize the working speed (approximately 2.000 labels 100x100mm per hour).

I-Mark software accepts a square black mark having the side not lower than 4mm, it can be placed up to 3mm close to the image, this condition is helpful to save waste media.

It requires Windows Operation System while the input files must be designed by Corel Draw or Adobe Illustrator.

PLOTTER FEATURES

Maximum Roll Diameter	250 mm
Internal Roll Diameter	3"
Media Width	Maximum: 225 mm Minimum: 110 mm
Maximum cutting area (W x L)	200mm x 300mm
Maximum cutting speed	600 mm/s (all directions)
Maximum guaranteed cutting force	2.94 N (300 gf) in 31 steps
Blade type	supersteel
Media type	Self-adhesive marking film and paper (Polyester film up to 0.25 mm thickness)
Interface	USB2.0
Power source	100 to 120, 200 to 240 VAC (auto switch), 50/60Hz
Power consumption	120 VA
Compatible standards Safety	cUL, CE mark
